# Article Title

Written by Super User on 12 April 2012. Posted in Blog

Default Lorem ipsum dolor sit amet.

Primary Lorem ipsum dolor sit amet.

Lead volutpat, commodo elit nibh ligula gravida. Magna auctor, eget venenatis, id phasellus luctus sodales, nam pulvinar.

Lorem ipsum dolor sit amet, nulla varius ac quis, elementum pellentesque sed rhoncus lacus venenatis, mauris adipiscing tortor. Orci elit nam donec integer sed ullamcorper, ut sed

et. Consectetuer vel suspendisse purus sit laoreet, etiam convallis quis. Porttitor blandit auctor at porttitor nonummy.

Large ornare venenatis scelerisque sapien in elit. Fusce rutrum quisque tellus mauris dolor, per malesuada leo.

Small path of the righteous man is beset on all sides by the iniquities of the selfish and the tyranny of evil men. Blessed is he who, in the name of charity and good will, shepherds the weak through the valley of darkness.

# Tokens / LESS Compile

---  
1. Global Design Tokens (start here)  
  
src/less/components/variables.less - The master file. All other components inherit from these:

Token: @global-font-family  
Default: System fonts stack  
What it controls: Body + heading fonts

Token: @global-font-size  
Default: 16px  
What it controls: Base font size

Token: @global-color  
Default: #666  
What it controls: Body text

Token: @global-emphasis-color  
Default: #333  
What it controls: Headings, bold text

Token: @global-muted-color  
Default: #999  
What it controls: Secondary text

Token: @global-link-color  
Default: #1e87f0  
What it controls: Links

Token: @global-link-hover-color  
Default: #0f6ecd  
What it controls: Link hover

Token: @global-primary-background  
Default: #1e87f0  
What it controls: Primary brand color (buttons, cards, labels)

Token: @global-secondary-background  
Default: #222  
What it controls: Secondary brand color

Token: @global-success-background  
Default: #32d296  
What it controls: Success states

Token: @global-warning-background  
Default: #faa05a  
What it controls: Warning states

Token: @global-danger-background  
Default: #f0506e  
What it controls: Danger/error states

Token: @global-background  
Default: #fff  
What it controls: Page background

Token: @global-muted-background  
Default: #f8f8f8  
What it controls: Muted sections

Token: @global-border  
Default: #e5e5e5  
What it controls: Border color

2. Theme Overrides  
  
src/less/theme/variables.less -

Currently empty.  
This is where you add brand overrides without modifying the core. Just redefine the variables here and they'll cascade.

3. Typography Details  
  
src/less/components/base.less - Controls heading font-family, weights, link decoration, etc. Key vars:  
@base-body-font-family /  
@base-heading-font-family (both default to @global-font-family)

@base-heading-font-weight (normal)

4. Component-Level Theming  
  
Each component has its own Less file in two layers:  
- src/less/components/\*.less - Core defaults (e.g., button.less, card.less, navbar.less)  
- src/less/theme/\*.less - Theme-layer overrides with hooks

Key files for brand appearance:  
- src/less/theme/button.less /  
- src/less/components/button.less  
- src/less/theme/card.less /  
- src/less/components/card.less  
- src/less/theme/navbar.less /  
- src/less/components/navbar.less

5. SVG Icons  
  
src/images/icons/\*.svg - ~120+ SVG icons.  
pnpm icons

---  
Recommended Workflow

1. Edit src/less/theme/variables.less with your brand colors/fonts (cleanest approach - no core modifications)
2. Drop brand SVGs into src/images/icons/
3. Rebuild:  
pnpm install  
pnpm compile
4. Redeploy:

npm wrangler pages deploy \_deploy --project-name uikit-demo
